THE SOLAR ENGINEERING GUIDE TO SKIN TANNING SUN AVOIDANCE (PAPERBACK)

Mike Hrabczuk, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Don't let the name of the book fool you it's not a text book, we won't be getting into any engineering calculations, and the goal of the book is to describe in very simple laymen's terms the nature of solar energy, solar geometry and our existence within the universe, using skin tanning and sun avoidance as a metaphor, no rocket science here. The purpose of this book is to entertain, educate and share knowledge, which hopefully will provide you with a learning experience and aid your understanding of our physical world as well as opening avenues for you to contemplate your human existence as well as your philosophical, cultural, evolutionary, and spiritual beliefs. You will be provided with simple examples, analogies, and other anecdotes to aid your understanding and provide you with some level of entertainment value while you contemplate your human desire to either seek sun worship or sun avoidance. Hopefully you might learn something or at least enhance and expand your useless knowledge library. The book is based on facts and known principles of physics, mathematics and heat transfer (in simple terms) along with beliefs and analogies of the author that may or may not make sense, you may not agree with some of the author's opinions, you need to think through your decisions and contemplation and form your own opinions. I am expecting that this book can be read in 4-6 hours, (about the time you would sit by the pool, beach, or kill your flight time going there) and ideally I would like you to start from the beginning and work through the book, but I...
