Novas Edições Acadêmicas Mai 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x7 mm. This item is printed on demand - Print on Demand Neuware - Este projeto compreende na elaboração de um diagnóstico ambiental para as operações de lavra e beneficiamento do minério, apoiado em preceitos do desenvolvimento sustentável e aplicado ao caso das Pedreiras localizadas na Região Metropolitana do Recife (RMR). O escopo do trabalho inicia-se com as avaliações qualitativas por meio de entrevistas, checklists, observações e análise de documentos para a verificação do potencial de risco dos agentes químicos incidentes, referente às poeiras oriundas da operacionalidade de Pedreira em Jaboatão dos Guararapes no Estado de Pernambuco. Na sequência, foram quantificados os particulados em suspensão no ar atmosférico (Partículas Totais em Suspensão - PTS e Material Particulado Inalável - PM10 ou inferior). Importante ressaltar que os poluentes atmosféricos, especificamente as poeiras minerais, representam o significativo percentual de 80% do impacto ambiental gerado nos empreendimentos em questão, podendo provocar alterações na qualidade do ar ambiente. Portanto, é fundamental a avaliação, monitoramento e controle das emissões atmosféricas das Pedreiras para a preservação da saúde humana e do ambiente local. 124 pp. Portugiesisch.
