

# Invasive Plant Management for Kenai Fjords National Park: 2012 Summary Report

By National Park Service

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Kenai Fjords National Park (KEFJ), at over 1500 square miles, is dominated by the massive Harding Icefield and the many glaciers flowing off of it. Over 500 square miles of park land is covered in glacier, and much of the rest of the park can be classified as early-succession, postglacial environment. These recently disturbed landscapes are highly susceptible to invasion by a number of non-native, invasive plant species which can out-compete native species and have a negative impact on natural ecosystem diversity and processes. This item ships from La Vergne, TN. Paperback.
